Glendale

Leading a greener future

A photograph of a garden with a green semi-transparent text box in the center. The background shows a path leading through a garden with various plants and trees. The foreground is filled with dense, low-lying green shrubs. The text box contains a quote in white italicized font.

*“Our parks and open spaces are widely recognised as being the very best in London. This could not have been achieved without the hard work and dedication of all involved”*

*Client, Group Manager*

## About Glendale

Glendale offers an all encompassing green space management service at a national and local level. We are skilled designers, suppliers and distributors of commercial landscape maintenance, tree management, landscaping, landscape architectural services, planning consultancy and woodland management activities, tackling these, and various other green space management tasks, for clients in the commercial sector across the UK.

Our portfolio of clients have remained with us for decades and benefit from the expert services we offer.

As a national company, our team of trained professionals are well equipped for any scale of work. We are involved in many projects including the maintenance of grounds at major airports, horticulture works at manor houses and tree management in country parks - to name but a few!

We are accredited to ISO 9001 Quality Management, ISO 14001 Environmental Management and ISO 45001 Occupational Health and Safety Management standards so you can rest assured that working in a safe environment and delivering a quality service that reduces our environmental impact is our main priority.

Whether you need regular grass cutting throughout summer, gritting during winter, a full commercial landscape maintenance programme for the year, tree planting, tree relocation or an all-in-one package, don't hesitate to contact us to discuss your requirements.

Leading a greener future

A photograph of a modern, multi-story building with a glass facade, reflecting the sky and surrounding environment. The building is situated in a landscaped area with trees and a paved walkway. A green semi-transparent rectangular box is overlaid on the right side of the image, containing a quote and a title.

*“Glendale has proven itself to be a company dedicated to continuous improvement in both the services it provides and the need to continually adapt to changes. We look forward to the next period in the relationship and will continue to value the services Glendale provides.”*

*Client, Senior Contracts and Quality Manager*

# Commercial landscape maintenance

## *Because first impressions count*

The external space around a building is a valuable asset; it's a place where nature can be nurtured, employees can take a break and visitors can socialise. It also gives potential customers, and staff, their first impression of your organisation or estate and the level of its quality influences their perception. We can help you make it a good one by ensuring it receives the same level of professional attention as the buildings within.

We handpick our staff to work alongside you to achieve your vision of the perfect look for your environment. We have managed and maintained almost every type of landscape over the years from business parks to stately homes, and castles to highways.

We know a thing or two about achieving lasting results that won't cost you the earth and our approach is born over 25 years of delivering green space management services. You can rely on our flexibility, quality of service, attention to detail and discretion.

Leading a greener future

*“A crisp modern planting scheme provided a pleasing aspect near the roadside, whilst the native trees, shrubs and wildflower areas to the rear will benefit nature.”*

*Judge, British Association of Landscape Industries Awards Panel*

# Environment, planning and landscape design

*Thoughtful, imaginative and practical landscape design and development solutions for a sustainable, attractive and inspiring future*

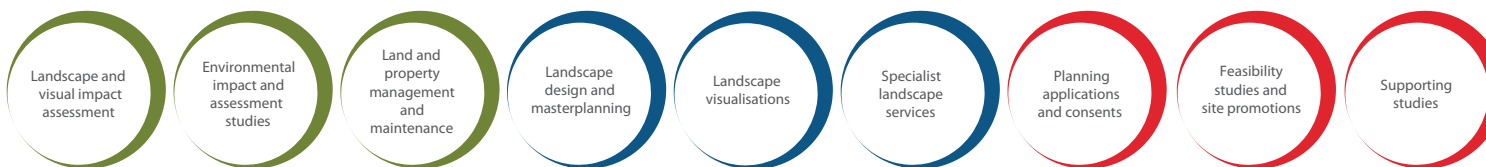

epd's (Environment, Planning and Design) approach is one of creating and implementing innovative solutions that aim to impress. The team is a client-focused multi-disciplinary consultancy practice, that prides itself on developing strong working relationships, clear communications and sound project management.

epd provide landscape design and services of a scheme on site - from start to completion.

Together with epd, we provide a one-stop-shop, taking the burden of dealing with several suppliers, reducing costs and time spent on managing projects.

Our teams take great pride in our successes including:

- The challenging and creative play area we designed and implemented that contributed to Rufford Abbey Country Park winning Visit Nottinghamshire's 'Visitor Attraction of the Year' in 2018.
- Lincolnshire Police's commendation on our fitting design and implementation of their memorial garden "an outstanding job bringing the design to life".
- The award-winning community space at All Saint's Kings Heath which provided flexible community space in the grounds of a highly sensitive church/churchyard.
- We have designed schemes for award-winning gardens at RHS flower shows.
- Our long-standing relationship with industrial park developers for whom we provide both design and contract management services.

*“Over the past 10 years, Civic Trees has planted many large trees on the estate including specimens for a new arboretum. They have satisfied the need for quality work in a timely manner and within a designated budget. I am satisfied with their performance and would recommend them to others.”*

*Client, Estate Manager.*

# Civic Trees

*Supplying, handling, planting and relocating mature and semi-mature trees since 1963*

Our large tree specialists at Glendale Civic Trees believe that a tree is only as good as the way it is handled, planted and maintained.

Glendale Civic Trees supply and plant large trees with precision, care and attention - from a single feature tree to an avenue or arboretum. All of the trees supplied by the team are sourced from specialists, leading growers and checked for quality.

Our tree specialists are also fully-equipped to relocate large, delicate trees from one location to another using industry leading techniques before successfully planting. They respond to enquiries from all over the UK.

Glendale Civic Trees has over 50-years of experience creating landscapes with truly instant impact.

Together with Civic Trees, we offer a variety of services including:

- **Semi-mature/large tree planting**
- **Aftercare and maintenance**
- **Tree moving**
- **Tree sourcing and supply**
- **Landscape construction**
- **Retrospective tree pit resurfacing**

**Supply | Plant | Relocate**

*“Client retention rates, customer satisfaction and external accreditations were among the factors taken into consideration as Glendale was awarded the Business Award for Arboriculture Contractor of the Year 2018.”*

*Horticulture Week*

# Tree management

## *From root to tip*

Our tree surgery teams are most at home in green environments and are regularly called upon to provide tree management services for business and retail parks, highway departments, country parks and utility companies.

Trees can pose a threat if not properly managed, particularly during strong winds and inclement weather. If a tree is on land owned by you or your company, it is your responsibility to maintain. We can help you manage the risks, preparing your trees for adverse weather and keeping them safe all year round.

As one of the UK's premier tree care specialists, we can supply a definitive range of tree care services including a full suite of tree surgery services, dangerous tree removals, vegetation management alongside high voltage power lines, and tree planting projects. We are also qualified to take care of tree surveys and inspections, promoting sustainable tree management for the future.

In the midst of a crisis, you can call upon our 24 hour emergency tree services, 365 days of the year!

*“Our tree team, who were on standby for any tree related emergencies, cleared thick snow from footpaths using a ride-on Vermeer S800TX and our grounds teams cleared and gritted the paths.”*

*Glendale Contract Manager, North East*

# Winter maintenance

## *From gritting to snow plowing*

Plan the work and work the plan - that's our advice when it comes to seeing through the winter months without any slip ups!

We offer a preventative and reactive gritting and snow clearance service so that your landscape does not pose a threat when conditions take a turn for the worst.

We offer multi-site coverage, and we are capable of getting to even the hardest to reach places quickly. Using advanced forecasting technology via the MET Office to predict weather patterns, we can be there before the weather really bites.

We will let you know when your sites have been treated, live from the field to your smart phone with our work programming App, Glendale Live.

When bad weather plays havoc outside, feel free to call us for emergency assistance - we offer 24/7 cover.

The UK is renowned for being caught out in the cold by the winter weather, but with our sophisticated winter maintenance programmes there should be no reason why your business cannot continue to operate as usual.

Leading a greener future

A vibrant garden scene featuring a variety of plants. In the foreground, several tall yellow flowers with dark centers are prominent. To the right, a wooden bench sits on a stone path. The background is filled with dense green foliage and trees, creating a serene and well-maintained garden environment.

*“The transformation to Millennium Gardens thanks to Glendale is excellent. We are really pleased that the garden can now be easily accessed and enjoyed by all. During the open morning, we received many compliments on how the garden was looking.”*

*Client*

## And for everything else...

### *We've got the answer*

We don't say it lightly when we label ourselves as the UK's most complete green service specialist.

We supplement our core green space management services with a number of activities including horticulture supplies, golf course management and woodland management.

- **Horticultural supplies** - producing more than 18 million plants per annum with over 100 years experience. Our range includes bedding plants, soft fruits, vegetables and herbs, herbaceous perennials, shrubs, trees and hedging. We supply major retailers, independent garden centres, landscape professionals, garden designers, private estates and a large cross section of commercial operators.
- **Golf course management** - we have invested millions into our six, high standard golf centres, located in various parts of the UK. We recognise the importance of a course's playability, therefore any golf course regeneration and improvements we embark on are done with the utmost attention to detail and are always true to the traditional heritage and design of each course.
- **Woodland management** - the tax advantages and economic incentives that come with private woodland ownership make it a highly cost effective gateway into land ownership. Our experts can give you all the assistance you need to make the leap into owning woodland without any hitches, or revitalise existing woodland you already own.

Leading a greener future

A person wearing a green uniform is shown from the side, holding a clipboard and writing with a pen. The background is a blurred outdoor scene with green foliage and a green car. A semi-transparent green box is overlaid on the right side of the image, containing a quote.

*“Glendale have delivered a high quality service to our customers for a number of years, this has been achieved by working closely together to deliver the contract specification. Glendale Live is a very important tool, it is an open and transparent system, which is used daily by us, to aid the effective monitoring of all aspects in the delivery of the contract and provision of information to customers”*

*Client, Green Space Manager*

# Glendale Live

*Real time updates as and when you need them*

For access to all project performance related data, 24-hours-a-day, 365-days-per-year, in real-time look no further than Glendale Live.

## What is Glendale Live?

Glendale Live is our user-friendly, cloud-based work programming, monitoring and reporting system to provide a comprehensive, hassle-free, asset management solution. It is a one-stop-shop for all contract related data and is available on both mobile and desktop devices.

Glendale Live facilitates:

- **Real-time contract data**
- **Live photographic evidence**
- **Complete transparency**
- **Proactive contract management**
- **Opportunity to find efficiency gaps**

The facts:

- **It uses a Google SQL database for the precise mapping of sites, asset locations and stock condition**
- **It can be fully integrated with existing ICT systems**
- **Accurate map production by our in-house QGIS team**
- **A dedicated Android App**
- **Can be completely tailored**

## How will it benefit you?

You will have secure access to a bespoke dashboard on Glendale Live, 24/7 summarising all of the must-know information you need in real time, including:

- **The full work programme broken down by day, week, month, site, task or team**
- **Records of accurate maintenance e.g. sites managed that day and the tasks completed**
- **Project delays and recorded issues**
- **Photographic evidence**
- **Live charts for instant analysis**

The instantaneous nature of Glendale Live keeps you in the driving seat in terms of the work programme, and ensures the answers to the majority of operational questions are available right at your fingertips. Data is available from any location with internet access and is updated by our teams live in the field allowing you to get an immediate update on progress for all programmed and ad hoc works.

It provides us with accurate data to maximise the efficiency and effectiveness of our green space management solutions. When teamed with our vehicle tracking software we can put measures in place to reduce our environmental impact.
